

Please reject NAB petition 04-160. I should be able to receive local content from my xm radio. Telling me I have to listen to weather info on my local radio station is like telling me I can only buy groceries from the nearest store, or that I can only go to the nearest doctor or hospital. If the NAB wants me to listen to their stations, then they should improve their service, and not depend on the government to provide them with a monopoly. They should try to improve their product, not limit competition.
